ABSTRACT

Over 1500 books published between 1911 and 1971 are cited, by publisher, in this bibliography of reference materials about the American Indian. In addition to the citations, many with annotations, are lists of bulletins, booklets, recordings, and agencies to contact for information and pamphlets. The purposes of the bibliography are (1) to provide information to help all Americans better understand and appreciate the heritage, customs, and culture of the American Indian, as well as the great contributions he has made to this nation, and (2) to encourage the purchase of more reference materials and books on this subject for school libraries and classrooms. This publication supersedes an earlier edition entered in the ERIC system as ED 030 531. (JH)

AND REFERENCE MATERIAL

IDAHO STATE DEPARTMENT OF EDUCATION
INDIAN EDUCATION
BOISE, IDAHO

RC005512

The first attempt, by the Idaho State Department of Education, to make available to our schools a list of books about the American Indian, was well received. The information presented at that time was incomplete, but did provide a source that librarians and school administrators could use as a beginning to put this type of material into the hands of students as well as adults.

In 1971 the bibliography was revised and is a great deal more comprehensive. THIS EDITION SUPERSEDES THE 1968 PUBLICATION.

The purpose of this publication has not changed; it is the same now as it was in 1968. This information is offered in order that all Americans can better understand and appreciate the heritage, customs, and culture of the American Indian, as well as the great contributions they have made to this nation; and to encourage the purchase of more reference materials and books on this subject for the libraries and classrooms of our schools.

THE AMERICAN INDIAN HIGH SCHOOL DROPOUT: THE MAGNITUDE OF THE PROBLEM - by Alphonse D. Selinger, 1968. The magnitude of the dropout problem among Indians is illustrated by the study, which followed students registered in grade 8 as of November, 1962 through June 1967. Statistics were gathered by area, state, type of school and tribal group in Oregon, Washington, Idaho, Montana, South Dakota and North Dakota. ERIC 75¢ MF, $8.90 HC (Document ED 026 164)

THE AMERICAN INDIAN GRADUATE: AFTER HIGH SCHOOL, WHAT? - Alphonse D. Selinger, 1968. American Indian students who graduated from high schools in six states in 1962 were located to determine experience patterns in the six years after high school graduation. Interviews were conducted with 287 students in 13 states. About 70 percent entered post high school academic or training programs, which approximately half completed. Employment was frequently unrelated to training. Study results suggested Indians should have direct involvement in the programs designed to aid their development.
